

CRISTAL

GLASS POLISH POWDER

FORMULATED WITH ULTRA-PURE
99.95% CeO_2 - ANALYTICAL REAGENT
GRADE & RARE EARTHS

**Surface
Imperfection
Reduction**

**Enhanced
Glass Clarity**

**Controlled Polishing
Performance**

Restores optical clarity to glass. Removes fine scratches, sanding marks, imperfections, haziness, water spots, limescale and mineral deposits for crystal-clear glass. Formulated with 99.95% pure CeO_2 - Analytical Reagent Grade & Rare Earths, the purity standard used in precision optics. Non-toxic, zinc-free formula with no fumes. Safe for all workspaces.

DIRECTION OF USE

1 *Mix the powder with water. Create a smooth, consistent slurry*

2 *Apply the slurry on pad. Use a felt pad or polishing pad to begin*

3 *Start polishing at low speed. Spread evenly across the surface*

4 *Increase speed and continue polishing. Work in overlapping motions*

5 *Maintain moisture during polishing. Spray water or add paste if drying*

6 *Wipe and inspect the surface. Clean area to check final finish*
